CEO UPDATE

Bond Day Hospital continues to grow, with increasing occupancy of the day surgery and development of new services.

Minerva Fertility provides a full range of IVF procedures. Monash IVF performs egg collections.

The day surgery now performs Fertility Surgery and Plastic/Cosmetic Surgery. Dr Antony Lighten performs surgery for the investigation and treatment of infertility. Dr Gavin Sandercoe performs plastic and cosmetic procedures, including breast surgery.

PLANS FOR EXPANSION

Bond Day Hospital is starting a new collaboration with Tasly Healthpac. Tasly Healthpac are an international company based in China.

Located on the same floor, Tasly Healthpac will be opening a large complex of research laboratories, in addition to consulting rooms, and a pathology collection centre.

There will be a research institute, Renew Australia, specialising in novel stem cell treatments. Research is being planned into a number of conditions including Type 2 diabetes, poor ovarian responders in IVF cycles and erectile dysfunction.

Doctify Patient Feedback Comments:

Amazing service. I felt very safe & well cared for

Staff are incredibly friendly and thoughtful

From admission to discharge a seamless experience

The facility is amazing, clean and modern with a genuine boutique feel

All information was communicated clearly

This was my second time here and again was an excellent experience

It was my first time under anaesthetic and the doctors and nurses were all so beautiful and reassuring
